BENEFITS:

- Improves the soil structure, air circulation and water retention capacity of the soil
- Retains nutrients and prevents them from leaching away the plant roots
- Contains both the naturally occurring organic micro-nutrients (calcium, sulphur, magnesium, iron, etc.) and macro-nutrients (nitrogen, phosphorus, and potash) essential for plants
- Microbes accelerate the breakdown of crop residues in the soil. This improves the texture of the soil and also releases the locked-up elements
- Increase the yield and quality of field, vegetable, tree and fruit crops
- Can easily be applied as both base-dressing and top-dressing
- Improves alkaline and saline / acidic soil
- Helps the growth of the roots by improving the soil structure
- Ultimately, it improves the crop yield by improving soil fertility and soil structure
- Useful for all types of field crops, vegetable crops, orchards, kitchen gardens and flowers
