

# *HumiRich*

Humi-Rich is easily assimilated by plants and some of its main functions include improving plant immunity, improving plant metabolism, improving plant root development, improving the supply of plant nutritional elements and increasing the formation of ferments.

Humi-Rich promotes the increased accumulation of chlorophyll, sugar, amino acids and more and improves the efficiency of nitrogen utilization, allowing for reduced fertilizer rates. Humic also increases general plant productivity, in terms of yield, as well as plant stem strength. Within the soil, humic stimulates soil microorganisms, promoting Humus.

Humi-Rich can be used with all types of chemical fertilizers, PGRs, etc.

## **Crops:**

- All crops.

## **Directions of Use:**

### **For field crops:**

- (Sugarcane, cotton, wheat, vegetable, etc.)
